The first part of the paper is devoted to a discussion of the
 general principles of the theory of the structure of the
 crystal lattice. It is shown that the structure of the
 crystal lattice is determined by the arrangement of the
 atoms in space. The arrangement of the atoms is
 determined by the forces of attraction and repulsion
 between them. The forces of attraction are due to the
 electrostatic forces between the positive and negative
 ions. The forces of repulsion are due to the
 electrostatic forces between the like ions. The
 balance of these forces determines the structure of the
 crystal lattice.
